AHMED ABDUL AMEER

ahmed68257@gmail.com
07717047900

Date / Place of birth: 9/3/2000 / Basrah   Baghdad, Baghdad - Iraq

A solution maker and technical innovator, I've turned my ideas into practical projects, such as a smart garage system using Arduino and RFID. I have a passion for self-learning and an ability to analyze complex problems and simplify them programmatically. My most notable accomplishments include managing and connecting networks remotely to centrally update content. I am focused, passionate about development, and skilled at working with embedded systems, networks, and databases.

Skills

— Effective Time Management   — Analytical Skills   — Decision Making

— Time Management   — Collaboration & Teamwork   — Communication Skills

Employment History

programmer, Baghdad

An ambitious engineer/programmer with a strong background in technology and programming, passionate about learning new things and continuously developing my technical skills. I have experience working with Arduino systems, programming embedded systems, and designing intelligent solutions to real-world problems, in addition to a solid knowledge of
